AI Assistant

What should I do if my dog can't stop shaking and won't eat?

This can be a sign of a pet emergency. Please contact your vet or an emergency clinic right away if you see:

- Uncontrolled shaking or seizures
- Refusing food or water for 24+ hours
- Pale or blue gums
- Difficulty breathing
- Repeated vomiting or bloated abdomen

While waiting, keep your pet calm, warm, and away from stairs or ledges.
